

# Heat transfer oil

# TOOL-THERM SH-3

**Operational use: +30°C up to +360°C**

## Adapted for temperatures until +360°C

The heat transfer oil TOOL-THERM SH-3 is a high quality special oil which can be used in a temperature domain from +30°C until +360°C.

On the contrary to other kind of heat transfer liquids, the TOOL-THERM SH-3 is not classified as poisonous. Therefore it is not considered as hazardous goods in the sense of transport regulations.

## Technical specifications

|                                |   |
|--------------------------------|---|
| Description:                   | mineral oil   |
| Domain of application:         | only adapted for the use in temperature control units |
| Maximum operating temperature: | 360°C   |
| Minimum operating temperature: | approx. 30°C  |
| Colour:                        | yellowish / light brown                               |
| Water solubility:              | difficultly soluble                                   |
| Poisonous category:            | none - no hazardous goods                             |

This heat transfer oil replaces all sorts of heat transfer liquids former supplied by TOOL-TEMP. Technically seen it has better properties, a higher temperature domain and can be mixed with most mineral heat transfer oils.

## Available packing units

**Barrel of 200 litres (180 kg)**

**Can of 25 litres (22,5 kg)**

Will be delivered in plastic canister
